IA Project Primer

> What are your initial knowledge on the authenticity of the IA project
> work? How well do you think you are prepared for the authenticity and
> ethical guidelines?

I think I am well prepared for the authenticity and ethical guidelines. I
am aware of the penalties incurred on not displaying authentic code of
yours without proper citation in your IA.

> Who will be your client and advisors?

Both my client and advisor will be my father.

> Are you planning to learn a new technology and implement as your
> solution for your client?

I am not planning to learn a new technology, as I already know Java and
HTML/CSS and am planning to make a webpage to integrate into an already
existing website.
